Hi Ici Factory, Your track "New Vibes (Extended Version)" for me is a treat for the ears, especially if you're someone who loves a mix of different instruments coming together. While the track features a variety of sounds, it's the electric guitar that truly steals the show—it's smooth, expressive, and adds a lot of personality. The music feels like it's telling a story without words. For me, it brought to mind a sunset drive, with the electric guitar leading the way like a warm, golden glow on the horizon. The other instruments—like the subtle percussion and layered melodies—add depth, but they never overshadow the guitar, which feels like the heart of the track. I loved how the song gave me space to just vibe and relax. It's the kind of music you can play while working, daydreaming, or even just enjoying a quiet moment. The extended version is a bonus because it lets you stay in that peaceful, yet dynamic, space a little longer. "New Vibes" is perfect for anyone who appreciates instrumental tracks with a standout lead. It's not just music—it's a mood. Definitely worth a listen if you need a soundtrack for your chill moments! Regards Ron

Articulated keyboards build a rich foundation, while guitar solos flow like an intimate dialogue, evoking deep emotions. The atmosphere of the song is a masterful meeting between electronics and blues, all guided by a creative and lively beat that gives movement and life to the track. The highlight is the meticulous arrangements, which reveal an attention to detail capable of enchanting the listener and leaving them immersed from start to finish. Good evening, Thank you for your message. Well done and thought out profile & presentation. Freedom is the word that comes to mind when listening to your title. The musicality and performances / interpretations are clearly at the origin of this feeling. The production leads its way between early 80s jazz rock and a more current sound with a very creative ease. To be broadcast it's here on Groover and on submission@radiokc.fm

Hello! Firstly, thank you for sending your music for our enjoyment. Good music. It has a very fusion atmosphere, with a broken beat, grooved jazz, well-tuned guitars and improvisational characteristics in the solos. The keyboards make a beautiful base, with alternating sounds. Little by little, several instruments are added, such as winds, percussion, vibraphone. This mix is really cool. The technical part is great, with an impeccable mix and master. I liked the song, but for now, I'll just leave my feedback, ok? Keep sending us your news, we want to know more about your work. Congratulations on the launch. Luck and success. We are in contact.
